

Propellants

n-pentane

n-pentane: Blowing agent for aerosol gel formulations.

N-Pentane is an extremely flammable liquid hydrocarbon that can be included in personal care gel formulations using the traditional LPG propellant 3.2bar. The n-pentane acts as a blowing agent for the gel, generating the foam during the handling of the gel by the user.

N-Pentane can also be used as a solvent for non-polar products.

Chemical Name:

Pentane

CAS number:

N/A

Technical Characteristics:

- > Extremely flammable, colorless, deodorized liquid hydrocarbon.
- > Good chemical stability.
- > Poorly compatible with water and polar solvents.
- > It can be mixed with other propellants, in particular with LPG propellant 3.2bar.
- > Does not affect the ozone layer and low global warming potential (GWP).

Packaging:

- Cylinder
- Roll drum
- ISOtank

Applications:

Personal care
(hairspray, deodorant, etc.)

Normative:

GRIT (Gases Research Innovation & Technology) is committed to the continuous improvement of our inbuilt Quality Control, Environment and Major Accident Prevention Systems as well as close collaboration with our product and service providers. The scope of the system includes the packaging, commercialization, storage and innovation of technical gases and the management of residual fluorinated gas and halogenated solvents.

All this work is reflected in our certificates ISO 9001 & ISO 14001.
